

Teaching Walls

Specialist Educational Furniture Manufacturer

From our base in Worcestershire (UK) we design, manufacture and install bespoke furniture for schools and educational facilities throughout the UK, Europe and across the globe.

- ▶ Survey & consultation service
- ▶ Drawing & space planning service
- ▶ Bespoke design
- ▶ Extensive range of finishes
- ▶ CNC Technology
- ▶ Installation service & ongoing support
- ▶ Ethically sourced and sustainable timber

Witley Jones Furniture design, manufacture and install high quality bespoke school furniture.

We manufacture to order to meet your requirements, expectations and budget. Be it material type, finish, colours, shapes or dimensions, we help create furniture specific to your requirements.

Our in-house team works closely with you, your contractors and consultants, providing a total service from start to finish, beginning with a free consultation and design service.

Upon agreeing the final design of a project, we work with you to select materials and produce a schedule in conjunction with the overall project plan.

All school furniture is manufactured and assembled in our state of the art factories by experienced skilled staff. We have a dedicated installation team that deliver and fit all pieces of furniture onsite alongside our senior management team, who oversee the completion of every project.

Teaching Walls

A complete storage, IT and teaching solution for your classrooms, teaching walls are suitable for all subject areas including IT suites, science laboratories, food technology rooms and music departments.

We work with you to help maximise the available space and seamlessly integrate a whiteboard and interactive screen, offering additional storage through bookcases, cupboards and drawers to suit a room's specific dimensions.

We understand that space is at a premium and a storage or teaching wall can be the ideal way to maximise space and reduce encroachment into classrooms and corridors.

What is a Teaching Wall?

Design Service

Witley Jones Furniture offer a free design service on all teaching wall enquiries. We can work from your existing CAD plans for the rooms in question or we can visit site to survey the rooms free of charge.

We use two main design software; CAD, which allows us to work in 2D – normally for architect, designer and contractor-led projects and Cabinet Vison, which allows us to create 3D render drawings of your specified furniture options.

We are happy to work alongside your chosen architects, designers and contractors on your teaching wall projects and always encourage our customers to engage with their chosen furniture supplier as early as possible in the design process to ensure your furniture will work with other areas of the build such as window, radiator positions and electrical provision.

Sustainability

Witley Jones Furniture are continually looking at ways of improving the environmental impact of the goods and services we provide and are committed to continually improving our products and services to be as safe and sustainable as possible in the future:

- ▶ Regular product development and continual improvement meetings with key personnel from all areas of our design and manufacturing processes
- ▶ All timber and wood-based products we source are PEFC or FSC certified to ensure they are all ethically and sustainably sourced
- ▶ All of our packaging is recyclable or reusable
- ▶ We use Formaldehyde-free Lacquers
- ▶ Our manufacturing software optimizes board usage to ensure we have as little waste as possible.
- ▶ All of our timber waste and sawdust is used to fuel our biomass boiler system which heats our factory and offices as well as heating the drying rooms in our spray booths
- ▶ We have a programme of replacing our company vehicles to ensure they are running at their most efficient. We have an electric vehicle as part of our fleet and are committed to including more in future

Delivery and Installation

We offer different levels of both delivery and installation to suit your needs and will always be willing to change our offering to ensure we fully meet the needs of your particular project:

Delivery Options

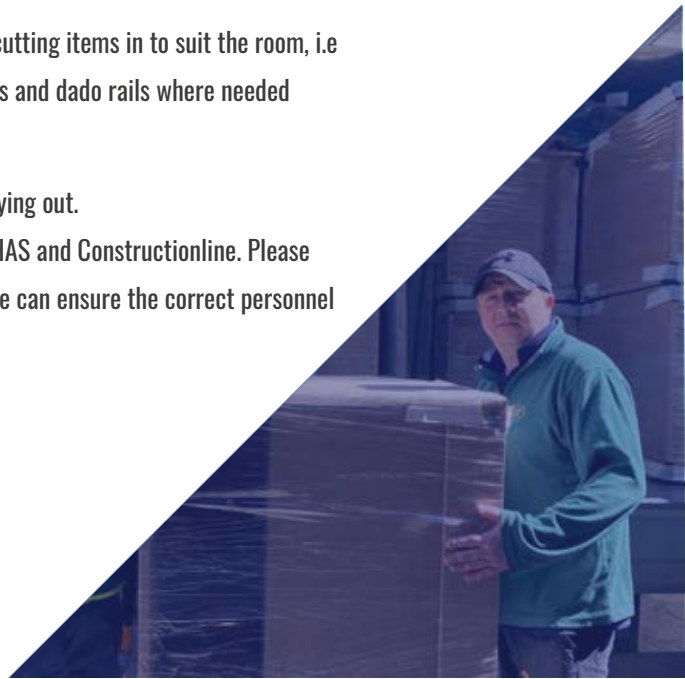

1. Ex works – Furniture will be quoted for the customer to collect from our factory in Worcestershire and for installation by the customer
2. Driver Only Delivery – We will deliver the furniture to your chosen destination with a driver only, the customer will be required to supply labour to offload the vehicle
3. Crewed Delivery – We will deliver the furniture to your chosen destination with a crew of personnel to offload the vehicle and carry the furniture into the respective rooms within the building

Installation Options

1. Client Install – Customer installs their own furniture. Witley Jones can supply fittings and assembly instructions where needed
2. Loose Installation – Our fitting teams will assemble and place the furniture as per the agreed room layouts and remove all packaging from site
3. Fixed Installation – Our fitting teams will assemble and fix furniture in place as per the agreed room layouts and remove all packaging from site
4. Fitted Installation – Our fitting teams will fully fit the furniture including cutting items in to suit the room, i.e cutting worktops into alcoves and scribing furniture around skirting boards and dado rails where needed

Our delivery and fitting teams are all fully insured for the work they are carrying out.

They are also DBS checked and hold CSCS cards. We are also members of CHAS and Constructionline. Please let us know where you require our staff to have DBS and/or CSCS cards so we can ensure the correct personnel are allocated to your project.
